Safety Policy Statement

At Hokitika Airport, safety is not just a matter of compliance; it is considered to be an integral part of everything we do and is vital for the commercial success of the Airport.

Through Safety Management, our Airport will continuously improve its standards of operations.

Hokitika Airport's key objectives in relation to safety are to:

- Identify and manage all significant risks in a proactive manner.
- Comply with both workplace and civil aviation safety legislation and standards.
- Encourage all staff and visitors to report all accidents, incidents, near misses, hazardous situations, or health concerns to ensure we learn and improve together. To that end, Hokitika Airport will operate under an open reporting Just Culture, where individuals submitting reports are not afraid of disciplinary action due to occurrences that result from errors or mistakes.
- Have adequate resources to ensure that all operations are undertaken in a manner that is as safe as reasonably practicable.
- Monitor, measure and continuously improve our safety performance.
